Troup I

Must Remain in Transcription Room

MR. NYTAND: Well, this is the fourth meeting and it is kex the last one in this, let's call it, series. It is still a Monday meeting. For that reason the nucleus is here because they will continue and they will take further responsibility. It was just a little bit of a thought I had at the time that it might be we useful and pregain many people did come and you must really consider it that it is not for me that you come if you come for Work you can come because there will be people to tell you about work to the best of their knowledge and the best of their intention, and there is no question about their seriousness, Sometimes I don't think that curiodsity people are serious. They are too flippant, too superficial. It does every not penetrate very much, It's just very nice/once in a while to hear about Gurdjiefr but you make it too complicated by placing it in the packground of your self with all your different interest?

out his life. He was respected, and when he died many hundreds of people came to pay respect to him. Work also is very simple. There's no fantare no pay respect to him. Work also is very simple. There's no fantare no pay respect to him. Work also is very simple. There's no fantare no pay respect to him. Work also is very simple. There's no fantare no pay respect to him. Work also is very simple. There's no fantare no pay respect to him. Work also is very simple. There's no fantare no pay respect to an influence jacket. You don't have to assigns. It's not necessary to dress up for it. You don't have to appear on the podium and make a speech. You don't have to distinguish yourself from other people. You don't have to ask for respect because if you work you will have respect because something of your personality will be sube ject to an influence which influence of course we call one's inner tife and the possibility of the development of that inner life for the sake of one self, for one's own equilibrium. Those who have come now for the last couple of weeksArealized I nope that we talked about something quite serious and that you may as well rorget about

your own superficiality when you wake want to have any dealings with Gurdjieff or the ideas The ideas will touch you in a certain place which sometimes you don't even want to admit, but you have to understand for yourself unless you let these ideas come in in the right way place they will not have any affect on you. The next rain will wash them away. When one talks about inner life, we talk about inner ousside superficiality of ordinary manifestations . We talk about motivation for the real Wish to find out what we are as human beings and the simpler we can try to find that out the more useful it will be to you. It is such a pity sometimes that when one talks about Gurdjieff and other people who do read and think about it and then try to use big words and think that it is necessary to know the exact pronunciation of Heptaparaparshinokh and words of that kind that is not in the Ideas of Gurdjieff. Why did he use every once in a while such words? To take them out of an ordinary surrounding A waich you already know and with which you are too I amiliar because of and which creates in you a certain prejudice, associations, you already think you know, and/of course you're no further interested in it. We talk about something that must engage you, in yourself in your conscience, And the whole question of  ${f 1}$ deas and when we talk about it is really answered by the Wish to want to make a Conscience, not even so much of a consciensness although the totality of what one could reach on this Earth for a man who could develop is call a Self-conscious state but it means a consciousness of his Self and that time which that includes his mind, but changed and it includes a man totally 🕻 includes his solar plexus also changed and it includes his body, but also changed. \to we talk about the possibility of growth, about someone who wants to find out if he can grow and wants to. And you don't find that out on the surface of your life. Every seven years all the different cells slough off and you get new ones but your inner

 $m{t}$ ife is  $m{stil}$ l there and is not sloughed off only it is a little bit unused and a little small, and many times it stays/in its infancy because there is no proper surrounding in which it dares to grow up We talk about such things and naturally when one talks about one's Inner tife you have to talk about that what really compels you to become a Man on this Earth, not knowing even why you happen to be here but gaite definitely in the acceptance of your self that you are alive on this Farth, that xxxx must go together with a definite meaning for yourself and a question which you ask yourself, Why in God's name am I born? And why should I continue with my life? And if I start possibility of the to pelieve that there is a/utilization of that what I am then I will try to find out what can I do in order to make it x more, let's call it Sperfect At least I want to have an understanding about myself and I cannot be satisfied with ordinary superficialities and nonsense that is being written about. When one wants to simple MARK you throw all the different nonsensical statements out of the window because you come to yourself and you yourself should be remained and be very simple within your inner Life. The manifestations and the different thoughts in your mindwof course start to affect you in a certain way and you are part and parcel of that; and sometimes it is necessary to look at them as thoughts and the kind of thoughts you allow and the kind of feelings you allow negative and positive and whatever it maybe and even your ordinary forms of behavior are not at all what you yourself, wish them to be, and you have no control, www You don't know what to do about it but that's exactly why we talk about Work Work has a meaning. It must give you an aim in your life otherwise it's no use trying to pay a little lio-servace threne to a few words and to know some words like gelf-consciousness and Impartiality and Simultaneity, throw them around as if you know it. You don't. You must learn to admit that you don't really know

very much about yourself, not even about your ordinary life you don't know much. because how often do you get sick and how often then are you dependent on someone else to tell you and to give you some pills? New that's your ordinary life; that is your own MEXX health statement, for yourself, for your body with which you have to work when you get woozy your mind your feelingshave no particular direction, they go all over the place NYou see, it is necessary first to establish that kind of a fact; What kind of people are we in our daily existence? And then maybe you can get along with yourself and ma ybe you make adjustments as well as you can and within the XXXXX limitations of your talents, but it does not mean as yet that you are satisfied if you keep alive, And many people of course don't stay alive. They remain in existence and they walk around a little bit and there are many cares that they have to take care of, and many things they have to do, and things that belong to economy and the way they have to make a living and the relationships they put up in at a certain time quite not knowing what the meaning k is but of course the body tells you that sometimes certain things are necessary and you start to justify it, and you have no idea where you are going And then you find out a little later you were on the wrong road and then you have obligations. Ind then what will you do? And there goes your life You are bound and one must know that first, that you are bound. You must know how small you are. You must know how every once in a while you have an idea to tell yourself, like whistling in the dark, that you are somebody. Youmust hear yourself every once in a while. You hear the tone of your voice by which you make certain statements, statements of hypocrisy, because you use every once in while certain words without having any idea \*\*\* about the content . And although every once in a while

of course you try to rill it, you find yourself with just a lot of words in your mouth and no particular anything that occupies your heart from where such motivations for a wish to work must come from. You have not the realization of Life existing in the form in which you happen to be, and not wishing even sometimes to accept that kind of a form and still that's the way you were born, and whatever the influences have been in your life and what has made you what you are at the present time and for which xxx xxx sometimes you are thankful and sometimes of course you hate it. And all of that you have to accept because you happen to be a human being on this Earth and living in this time. And there is no use philosophizing about how nice it would be if you could have lived in the time of the Menaissance or maybe that you were born too early and you would like to come back in two thousand five hundred or whatever it may be. we're here now and there is no mistake about it and you cannot just negate it if you want to remain alive for yourself. You will grow old if you don't remain interested in xxx your inner iffe. The oldness sets in because your interested in certain things in the outside world, and you become dependent much too much about what the outside world can give you; and using your brain for whatever it is worth you think that you may be very clever and even earn a little extra money and satisfy all little demands for yourself and for your body, and for whatever it is that you think that you're entitled to. and you may even become a little bit conceited . But what manner of man are you and what do you wish to become: And what is it that you really have as a wish to understand yourself You see, we talk about such things when we talk about the ideas of Gurdjieff pecause Gurdjieff was that kind of a man woo would dare to tell you what is wrong with mankind as a whole and to what extent you now wish to

apply that or to see it as the truth and to read it in All and Everything or every once m in a while stand in admiration for the Remarkable Wen he describes and that you wish then that you could become that and then let it go because you say than, 'Kes I cannot be like that. Gurdjieff was not that kind of a man to single out remarkable man as an example indicating that that was beautiful for them He had a meaning by writing about it. He wanted to tell that it was possible for man to become remarkable. And that is a different matter becausexim if in the ordinary unconscious state you have no particular desire to do anything about it or very little or just get sick and tired already in the beginning and give it up that you stick-to-it-iveness don't have any particular sticktoitiveness to find out for sure what is really right and what isn't, and to mumble a little bit about a whole lot of nonsense, yourself and yourself and to try to associate your thoughts and xideas with the tdeas of Gurdjieff and then go ahead and try to preach too much about it because you really have to fill the space and you 📾 enough know too much about it. Then you see you are too hypocritical about that. And then the questions will come and you have to answer them in accordance with your own experience. How will you get your experience? I'm now talking in a very general way to the people here who don't know **every** much about Gurdjieff and come out of, I call it, curiosity And that I hope such curiosity will stick and not only stick then will be changed because you want to change something about your life. And maybe you can come to the realization that something is necesssary. First place for your self to give you a little bit more equilibrium within, and a reason for your life and to have an aim in that life. But also if you keep on thinking and feeling mostly and become knkx emotionally involved in the condition of yourself you must gradually come to seconclusion that you have a certain responsibility

for your life. Otherwise what would be the use of just being here

and simply accepting the conditions of your life as they are, and die in time, and of course then, as we say, become fodder for the Moon. Or to help maintain the rest of the universe of our solar system or simply admit that one has been on this farth for a little while in order to find out, and your eyes remain/closedand maybe you have to repeat and repeat that kind of a process again and again. Because we have talked about the necessity of the acceptance of eternity of lire and you just cannot brush away the thought of something that bothers you too much because if you remain alive, I think you will have to face it. You see, you can die. And you can die to such thoughts. You may not allow them to enter into youx because, you say, I'm too occupied with other things and there is too much to enjoy and so you can spend your time and your energy and your money in any way you wish until you finally come to a realization that you are getting old, and that that want is external life for yourself cracks xxx up a little bitand there is nothing else in it, not your own life any more, its just alittle bitof feeding and keeping on an taking care of your body hen it becomes a little decrepit and your mind, when it becomes more or less senile, then of comese you lose interest! I say if you keep on having interest in your life you will have to come to a conclusion that you must do something with it and the conclusion that you must do it is based on the acceptance of a responsibility, and thinking and thinking and pendering and considering one way or another, and looking at it from different standpoints, you mush to come to a conclusion that something ought to be taking place and that you are the person who should do it and not remain dependent on circumstances. Circumstandes you're not going to change, not fundamentally, there are circumstances in this world which are not the fault of anyone in partacular. It is only a realization somethimes that a great many people cannot manage anymore what has been set loose and is now a

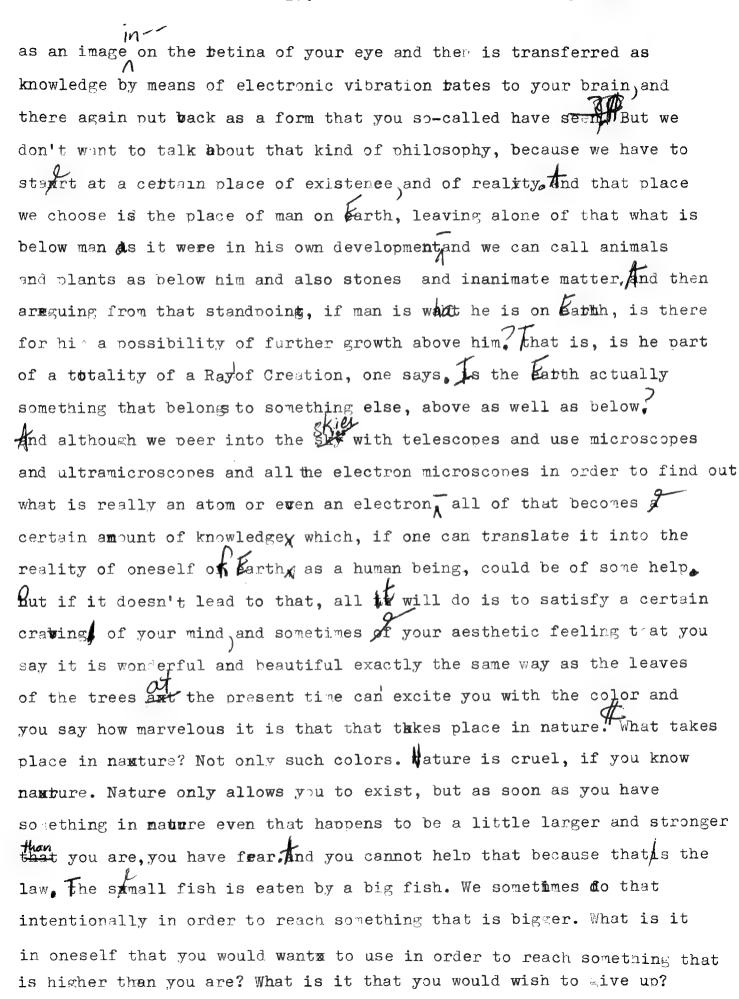

current and the current is too strong. When they play a little bit with ktomic energy, they commit atomic suicide; and we don't know how to handle it and cannot even et rid of the byproducts and we know that they are poisonous. All the time in our processes of industrial development we soil the earth, we soil the atmosphere and pollution now and all such things. It has gone on for quite some time, we know that, but we really don't care very much because not today, but tomorrow we will take care of all of that and tomorrow never comes because every day has a tomorrow and you keep on saying tomorrow so it never will be there. Because you don't want to solve it really because it would cost you too much. It would require your undelfishness instead of your constant desire to memain the center of your own little world in which you have to have your own satisfaction. That is why we talk about these particular traits of a person and the difficulty even in acccepting them, Because even if you know or rather that they become a little apparent to you and you want to think about it and you don'treally want to think about it, sometimes its forced on you because you cannot get out of the way, then you will find all kinds of excuses and reasons and that kind of rationalization process that takes place will explain away all kind of conditioning under which you have lived, in your education, and your father and mother are the best targets for it because you can simply say, ah, well, it was because I was born from such and such parents and Mother mature has been very cruel to me, and I have had too much to suffer and therefore, etc. etc.

You see, such things really don't count very much. Each person suffers either unconsciously or conscipously, because the condition of the Earth over required for a person, who is here, to suffer. It cannot be helped because that is the requirement of the Earth: to create frickion in order to maintain xx itself and to allow that what is called a Cosmic May to proceed and not get stuck on the Earth. For that reason, mankind has

that kind of a task, and we, unfortunately or fortunately, belong to that mankind and fortunate for us, if one can see it, that it is a necessity of one's life that one suffers and is born unconsciously on this earth or becomes so soon unconscious that sauth everything that was beautiful in a real sense of a conscientious and conscious sense, in the reality of such possibilities in a little child, that that already quite early in life becomes simply soiled I said last time written on, because it cannot be helped, everybody writes on someone else, And I receive constantly from the outside world such impressions which I must digest because my sense organs will wilt in that way that I have to take in what reaches me through my sense organs. I cannot close my eyes for any/length of time and I cannot close hearing, and I mush continue with the five different ways by which my mind is fed on impressions which I must receive in order to remain alive even, because if I don't get impressions, I will die. I will die as surely as I will die when I stop my breatning.

You see, for a man it is a different kind of a thing than for the other forms of narture and living plants or animals, because a man can realize what is taking place. Unfortunately animals cannot come to that kind of a conslusion, but they live and they do the best also they can for their own life to protect it and protecting their young and have also some feedling. But there is no admiration for a possibility of growth for them because they don't know what will come next after their arimal existence has come to an end. Maybe they are also reborn. Maybe there is a possibility that sometimes in an animal something else as life comes to the foreground and secause of the behaviour of simplicity of an animal we can be reminded of that we should be. But we have made ourselves much too complicated, and we should unravel ourselves and come down to brass tacks, and then know for sure what is what with ourselves and what can we do about it.

These are the questions you must ask yourself. What can you do with your life, with all the variety of different problems that are presented on this Earth, including war, including drugs, including bad education, including politics and selfishness, including desires to kill, All of that we live under and the sky magy times is cloudy because the Sun cannot come through. For us the Sun in our unconscious state of course is the Sun that we always see rise above the horizon and we think that it is something that gives heat and light. What Gurdjiefr means is: where is the Sun which is a real Sun, which is, as Consciousness, when alone by itself is cold and will not give off heat and why doesn't it exist? Simply because he trues to draw apticture of a man as he is and he talks about mankind he talks about those slugs who live on this Earth and he has a criticism about that. But before he can actually criticize, he must know that the reality of that what he is going to say is truth ful and not subject to any change in time. And because of that this kind of nonsense that every once in awhits appears in At Exerything and you look at and yes say what? Is this man actually insane or what does he mean? Ex Only means for you that you have not as yet grown up sufficiently to understand what is meant by your inner lifeand you do not know as yet what potentialities are of your own consciousness. You do not know what a man could become and you simply judge already about things that you don't understnad as if they are studict. The simplicity for a man is exactly that he will accept that what he doesn't know and simply say perhaps, not yet, but I will find out. That desire of wisning to find out is really at the basis of Work, This unflinching desire of satisfying, quenching your thirst, thirst for knowledge about yourself, because all the different ways by which knowledge is given to you are subject to failure. You are not sure that that what you see is actually there. You get used to it by saying it must exist because I can touch it, and another sense organ then helps you to satisfy your mind. But what is it actually that takes place

What kind of price do you want to pay for part of your life that can be dispensed with?

These are the kind of thoughts that you should have in your mind when

you want to remain a thinking feeling man, and interested in your life

as it is now and not have any mistake about it and not try to mislead yourself, and to have all kind of hallucinations about your wish, how it ought to be But the strength that has to be there for oneself must be based on something that is absolute reality for one on Earth. fand that is the existence of oneself as one is. All the rest becomes interpretation and that is why this condition that the acceptance \*\*\*\*\*\*\* for oneself as one is in reality is the foundation for Work. And the understanding first has to be understood that that kind of & foundation is necessary if you want to build for something that is higher than you are, because its either one way or the boher. Your lire on Earth will die. What will happen to your life? If it is something that you remain interested in and it is just your little body that is the interest and a little bit of feeling or a little bit of mind, it is quite aldright as far as Mother Namture is concerned; and the Earth will swallow you up and there you will be gradually disintegrating in the Earth, and what will be left of you, with the probably with the marvelous mind you may have had and the feelings which were so kind. What is it that you can do in order to continue?

Two ways exist for a man. One is ordinary procreation. He wants his life because it has been given to him, to be continued in the form of his children. That's his hope, and sometimes also many sacrifices which are necessary in order to educate his children in such a way that they receive something more than he has received, and the love that goes with that from parents in order to provide for their children different kinds of conditions that they then would have more opportunities for

thenselves. It is one way. It only stays on tarth to doesnt'g get any further. It remains means simply a change of conditions on the surface. It has nothing to do with the intensity of one's life. It has nothing to do with the possibility of freedom from this life. It has nothing to do with the possibility of finally reaching a state in which one can ascend to Heaven. The second way of course is creation \_ not procreation. Creation is for man an aim, so that he for himself throefforts has given to him tor known efforts which are allowed to him sets in motion certain desires. And then utilizing such desire for a purpose in the first place maintaining himself in as good a condition as he can remain even when he is on Carth, and at the same time using that kind of motivation for the production within himself of something that he creates. One can say that if he wishes to create something that he constantly has in mind the wish the for this creation to amount to something, to go somewhere, and to find out what is really a mystery to him at the present time thinking that when he is able to consider the possibility of such growth that he would like to define what is implied by that, let's say, freedom, or at least & a step up, or that what could become which is at the present time not now and waix ought to be attended to, and for which he then hopes he might have energy and insight actually to find out more and more about himself and what can be done with,when he knows what he is with himself to develop and evolve.  $^{\it H}$  You see the need for a person in that kind of a state when he really rouns around not knowing exactly what to do with his life then only the satisfaction of an ordinary kind-I call it ordinary because there is nothing extra prdinary about it. You might almost say, everybody is human and they all live on this Earth and they all eat and drink and die and/sleep a great deal of the time. But if I want to grow up, I mean up that is I want to get away from where I am now, if that can be understood as an aim, then you understand perhaps a little

4

bit about the necessity of Work on your self. But if that kind of a concept is not clear to you you will skirt around the Ideas of Gurdjieff and never reach the target. He aims to tell you in simple words what is the matter, and it is up to us to read it and let it sink in and to read apage and to take it along and to understand the book is for you and that what is being said applies to you, not to your neighbor. It will apply to your neighbor, but that is not your problem. Your problem is your own your problem is the development of your own perhaps conscience, of that what you feel you might become, and what you wish to become, I says sometimes, in order to become free of that what binds you at the present time. Ind if it actually does bind you and it bothers you and it does not leave any peace, or it does not allow you to sleep, and that you wish to wake up and you have bad dreams about yourself and that you feel that something then, because of such dreams is almost intolerable not to try to continue to search and search constantly uhtil you find. That you must have this kindxxx attitude of wishing to find. Because that implies that when you do find you must useit mix otherwise you are not sincere. You can say many times I wished I could become conscious without understanding what it is when you are conscious, and then what you should do then because you are conscious. If you don't take one with the other

you will never really become sincere. If I say I want knowledge of myself and I will not stop at trifles, and I will actually find out what, in reality, is method then I discover what is me and I come to the conclusion it is that and nothing else, and words can fail me and arguments can fail, and all kind of exclanation will fail me because I come back again and again to the same conclusion: This is really me. I really don't want to accept it when it is something I don't like. I can stay asleep without having any bad dreams about things, I like about myself. If I am serious I cannot sleep when I find things, I really don't like and sometimes one says that I sad,

that I do or that I feel, or that I think in certain ways that are not becoming to a real man and trying to define a real man as something that is still to be wished for or, to kee evolve towards, or that still has to develop out of that what I am, I again come back to the foundation what kind of a man am I now and on what kind of a foundation will I build the potentialities if they can be unfolded, into the actuality of my life in the future. T Such are the problems of a person interested in Gurdjieff. That is the deeper meaning of wanting to find out really about yourself and not to hesitate when you must come to conclusion that things are not quite right, and that you have been looking at the wrong thing and misinterpreting it and 5 ometimes coming to kke conclusion of an impossibility of a change, and sometimes simply trying to wash it away because after all you're not supposed to know everything and the road to God is too long Whatever your excuses mixt be and at what particular period of your life you will stop working I do not know. I hope xxxxx you will not stop. I hope it will constantly be like a little alarm clock within you, Everyonce in a while trying to wake wax you up. is not that you have to come to meetings. It is not that you have to read All and Everything every day maybe you can do without that for some time But what is needed is an attitude towards yourself to understand yourself really as you are whichever way you now want to waxxxxxx follow, whatever prescriptions more and more palatable, xx you.Sometimes a medicene is very bitter and xxxxxxxxxyou don't want t is kitter too bitter for your delicate taste. it because conditions in lire are not always so many nice and you get out of their way because you say I don't want to soil myself. You soil yourself in going away, because you don't know what/could be cleansing the XXXXXXXX power of having to deal with conditions which are very difficult and make you at suffer, but how perhaps such things could create for you the conditions of energy to be utilized for the on groth. U

#

We know so little about what is good for a man. We simply say in accordance with our ordinary rules of morality and \*\*xxxx ethical conduct, and that what you hear and what you interpret and what you make fit for yourself so that within your life you can be a little bit at reast and you can live with yourself and you don't have to bother and you wax grow a little older and you become a little more clever and then perhaps wix together with some maturity it is crushed in the way by something that is really more important at that time in your lire because, and whatever reasons you may have. Stop all that nonsense at a x certain time. Come to your Self in reality and see what you are even if you look in mirror, wen if you can at time when actually you want to sit down Aand consider what you are all by yourself, No one around and no way the gallery and Make a good impression, but that actually you could come to terms and with your conscience xxxxxxx at certain times \*\* \*\*\*\*\* whatever there is of it and you sit for yourself in the holy of the holies and you see what is there on the table as your book, what is being opened for you and in which there are certain things written to your credit and debit. Indelible ink You can not even erase it. Youread it because you have to read it when you are honest. Not togo out of the way of certain things that are disagrefable to you but simply eat through \*\* inorder to find out what is behind it. That is what you must do. But of course who will tell you that you ought to! & I can say it and I think it is necessary to realize that, and I can talk about the necessity of becoming responsible, but who am I to tell you? It's simply word for you, emphasizing of course what I feel that ought to be emphasized  $_{m{\phi}}$ But where does it go within you and into your conscience so that actually you would want to sit and be confronted by an image of yourself, and to see really what you are and willing to see it

and then to base on that your future knowledge of yourself and the acceptance of that what is then the truth for you. The EXMENSE change of yourself that you must really make regarding these f ideas f kk and the willingness then in accepting them, is that they could become part of you and of course should become part because you're not complete at all. and when you don't see it you're asleed and you dream a little bit. And all the time I try to tell you how necessary it is to wake up to such facts that you are not there at all, and that even if you try to talk about Work, where is your humbleness . Where is your knowledge of yourself, not knowing, where is it that your feel that that at certain times you really fail and that you have to do certain things about that when you are by yourself. And then come with questions that really you dare to ask because it is based on something that is not superficial Why do Italk at the present Last time I was not satisfied very much It seemed as if the questions we had hed previously had more or less exhausted you. again And then there was last week a little bit of a repetition of the same kind of thing. A certain question, yes - of a certain level, yes. And I had to accept it. And then, then what? (All right Bill)

When such questions come in a meeting, I'm disappointed of course.

But such disappointment really doesn't matter because I get used

to it. I know how difficult it is. I know what kind of a road is
ahead for anyone who wants to learn, and particularly learning what
is so unknown. But at the same time you establish with the question
a certain level, and for me to take that and then to try to rearrange
it a little bit and to introduce at the proper time certain to concepts that really were not in the question but could be understood
even from such a question. It is necessary then to bring the level
up until we reach a certain point of real discussion about wing

bjectivity, or about Work itself, or about the necessity for moartiality. And then having said that and I feel it is enough! Ind then the other question and then the other question x is again a little similar and it is also a little too low, and again I will have to bring it up. And of course I can do that for a little while and perhaps it is right but it is not really correct, and if I ask you this time I run a risk and for me this is one of the last meetings. It is necessary to dot the i's really and to come to definite conclusions about Work / what is really required when xx you say, I'm interested. I want to Work on myself. I have a wish for that. And then please tell me what I do, and then it is told. And then you don't do. Because you don't have the guts to do it, because your question did not come from the right place. It jast happened to be a little bit of a formulation somewhere but you were not engaged in it, and you were not xxxxxxxxx interested in getting an answer.  ${\mathcal B}$ ecause if you did you would  ${f W}$ ork, lacknd you would come the next week with results thexand of your attempts even if you didn't understand quite what it is you would do Work and there would be a change to talk about little 'I', about something that is created, to be created, is not there now but I wish it in order to help me x to tell me the truth about myself. This you must know for yourself when you say you are serious that you show your seriousness by asking the kind of questions that belong that level of seriousness. Otherwise what's the sense of talking about Gurdjieff and the  $oldsymbol{ ilde{I}}$ deas verything. And then of course I think about Gurdjieff himself. And I think about the different people who surrounded him, and the kind of nincompoors that were there and also a few intelligentand intelligentsia and those who x really thought they did know and theorized a great deal, and sometimes misused this theory entirely and came to the wrong conclusions. And I know the suffering of

4

Gurdjieff because at a certain time in his life and coming to America he stopped all that God dam nonsense and said either you choose between such theoris and such knowledge, or me. And if you wish to be with me, give up the others. This was the requirement that Gurdjiefr set for himself and this was his way of telling people come to yourself and see what you really want. If you want something that is nice and lovely to think about and to dream about and to talk about and to palaver and have all kind of lovely Hasnamussian statements and all kind of nonsensical nonsense about your ordinary life without touching even the requirements of an objectivity which is without any doubt necessary in order to reach a level which is not subjective Af we don't want to talk about that it is no use to talk about your ordinary life You can do anything in your life from the standpoint of Objectivity; It doesn't make a damned bit of difference. You die anyhow. Subjectivity or not subjectivity, / Beautiful thoughts and kindness and all the rest that goes with \*\*\* this world. You die to this world. You must understand that. You leave this world when you die And it's given to you at the present time in this world to find out how to die and with what you must go over kx into some other kind if you're interested in evolution. But if you're not/ (of course) then continue to palaver and do whatever you like talk from now until Doom's day and that will be your doom that day.

Sometimes we talk too much; sometimes we don't talk enough, sometimes the questions are not clear; sometimes the answers are not clear. I cannot put any mame on anyone for that. There is no blame sometimes for ignorance, where is no blame for inability, there is no blame for mechanicality, where is no blame for repetitiousness. There is only a certain sadness that everyonce in a while, having talked and having said many things over many years, that I still hear such little bit of a claptrap, such stubidity, such ignorance

and

that you study, and that you take time off to really find out a little more, that you should tryxks read All and Everything, that you should try to find out the meaning that Gurdjieff has tried to put into that book and that you really should study for yourself to find out, to become clear about what is Work when I wish to Work.

what can I understand about this observation when it is not an observation. Verhaps that's the wrong word and the implication of that many times leads you astrag but then when I say awareness, a word with which you have no immediatexxxx particular connotations and only the presence of someone else and you'are aware of their presence; to some extent it's right, but this awareness we qualify and simply say it is awareness/so cold: just mak**e**≰ a statement of rd, that is what a I wish the little 'I' to begin with: to be clear about myself, and to tell about myself the truth of myself that I can find out by means of this little 'I' telling me, because my ordinary mind will not do that and it cannot and Mother Nature will even prevent it from doing it, and there is a limit to the possible development of man on this earth because it is earth that fand Wother Nature doesn't allow him because she needs us to live and become transformers xxxxxxxxxx for food and the longer you live the better you are from the standpoint of Wother Nature. Until something in a man says, (The hell with you; I wish to me get out of Purgatory and go to heaven. The Mother Nature understands that language because it is positive, and it means that a man sets up his own shop and says, Regardless AT the gratitude I might have in being born here, the gratitude/towards my father and mother and wnatever it is that made me what I amaat the present time I come to my age and then I say to myself Megardless of Mother Nature Thank you for whatever you have done

xxx kind but I go into a differentx mark/ofakhe world, like a son leaves home and he doesn't want to be hidden or hide himeself by the skirts of his mother. When a person wishes to stand on his own feet, I call it Renaissance. \* It means the rebirth of your life into a different form within yourself. The possibility of that kind of a creation which we call Kesdjanian in a growth and perhaps leading to possibility of the a development of a Joul, so that man then could become complete within himself and then fulfill the requirements of the creation of himself within himself without the help of any other feets. understand it because a man then in that case is not sexual. He is a man only as man, alive, a human being. Sex has nothing to do with it. It happens to be on Farth. It is not another planet. There are no conditions like we have here. There are all kind of different variations of attempts to be made and the inclusion in that is different degrees of positivity and negativity, or activar and passivar. That is all right, xxx not the god damnsex x that we talk about all the time and even consider it floving each other. Ton't be a fool. belongs to your body and Mother Earth, and she is happy when you fall asleep with that. And it's quite all right if you want to make children, quite all right if you want to perpetuate yourname and leave money to your your/inheritance -as an inheritance to your children. Fine, it's a good rake for the barth because it helps the barth continue a little bit, and Mother Nature applauds it, because there will be a little bit more a few more people in the next generation, and you've done your duty when you have two children to replace you and your wife or whitever it mixt be. But it is not Life as it is meant by God, God had in mind the possibility of creating equilibrium as a necessity? of that what is alive around and omnipresentx to become known and to crystallize cut. Now you can say, Why? Simply because life is alive but the other situation of non-creation is dead, and if one says

4

God is eternal and links it up with omnipresence one must admit that there must what has to be an omniscience to be able to see what to do with the existence of life as a whole. And the only way by exist which such life could continue to item and not die was to create sections in this universe which became points of equilibrium. That would maintain life and undo the Heropass Gurdjieff talks about as if His Endlessness was eaten up, using simply such an expression to indicate what happens to man when he considers his time and he realizes his time, nis unique subjective time, in the wish to create the universe, God proclaimed that life should remain life and never die and he did that, you again can say, because of his omnipotence and he did it because he had omniscience

at tis command, utilizing now simply a few forms as if God was like a

kind of &

human being and simply dispensed this/wisdom in talking about -loving-Sun Absolute and about All-God-Father Tri-Unity whatever it may be that is acceptable so that you can more or less conceive of what's taking place. All of that then such creations was created from a central point which does not exist so-called acceptable simply to indicate and to give the realization of what actually did take place in this process of volution and so such wisdom was set by means of emanation) forth and then started on its way from this central point to make it known to the totality or the sarth that something x could exist eternal My. or that purpose it is necessary to understand what is the meaning of growthand what is the meaning or being bound, and ultimately realizing what ix created would have a certain bondage, And the further away from the central point of All-Wisdom, more bondage was necessary to keep it in proper place, therwise it would go helter-skelter and just do wast it pleased. And it had to be reminded that there is a law, a universal Law of Cosmic Rayexisting, proceeding at that time not as one ray but

presenting as many, or almost infinite rays, and then becoming clear

about that was infinite and not bound by one point and temporarily using simply this kind of a symbolism of certain form, to be created as d crystallization and so were the Milky Ways and so were the All-Suns and so were the Solar Systems on so became the earth as part of the crystallization of His Endlessness but quite far removed from bound by that time, And at the time the one poknt of origin and quite being at such a difficult place for the wish to continue the creation creating by God himself that then a certain task was laid on humanity to become in that kind of an octave this time starting in . going down to the original DO as a point of life-X SI-DO which extended into space further, which point of life for as is Anulios as the representation for us, being able to understand X that from the standpoint where we are, that man as tis at the present time being bound to the Earth in his unconsciousness is asleep, not knowing what is taking place in order because of that to fulfill the requirements of the maintenance of the universe at this place of FA in the octave. are subject to that kind of a As a result all men on this Earth Law or sleep and it is only those who remember why God wishes to have involvement take place/it became . clear that only involvement, involution, could become an actuality when there would be an evolution counteracting one force and creating be balance on the Farth, another so that then there would the development/ whan of thatkind of a and in man, and balance in becoming a real man is really the purpose for a man on this Sarth to understand the creation of this Sarth with mankind, the crystallization of tarth as it is with its own attempt to evolve and each hunan being with the notentiality also to understand what is evolution in his life. If man could evolve he would in involvement the solution for his own equilibrium. And this is the purpose

wfor Work: to find out what it is that can give me within myself sometimes I say'an at-ease-ness', being able Ato live where ver I live a balance/ everywhere and always and anywhere and never mind were but that within myself sometning could start to grow which gradually could produce such a balance in man and that would make him free from this world You see, these crystallizations are very important to understand them because within man, in his crystallization as he is/part or/Earth, the crystallization process that has to be shifted but this time with the aid of remembering Anulios force of . Nevolution Kecognizing that within him as the vital produce the potentiality which then becoming known he then can to him, will start to function in a certain way of gradually evolving from the state in which he is as a man, and then becoming more and more/like a planetary level, which is Kesdjanian, like a Sun, which a Soul which is real Consciousness That Karth at the present time from growth is war. It is needed for the feeding of the Moon and in feeding the Moon one forgets that the Earth ought to evolve. What prevents a man from growing up is his own civil war within; the fight that constantly takes place a man, not knowing exactly/the value of such a fight, but sometimes when it takes -quite clearly understood  $_{\mathbf{A}}$  when it takes on the form of an  $\Longrightarrow$  ordinary mind and an ordinary feeling constantly at odds with each other, and not knowing what is right because I feel it and I don't know it or because I know it and I don't feel it. This x I call x civil war within a man, and you first to understand how can I solve this particular process. What is it that prevents me at such a time into that Kind of see straight and my energy go constantly I cannot feeding my unconscious existence, and only little is be I touch or a real thought

4

That I then say at which side will I now take. Where will I gowith my mind or/with my heart? And the answer is not either one or the other. The answer is something of a force which I place between the two, and which I call the neutralizing of my civil war within. And that kind of a force is created by means of the little 'I', almost I would say all by myself but having in mind Anulios and having in mind God Almighty. That is why this Work for Myself is much more religious than you would want to admit, but I said last week religion is not that kind of a word that you think it is. It is just a way of coming to your inner fife and/reality for yourself about which you don't have to be ashamed, and that you could confess to that first when you are alone and admisting that there is war in yourself, and uneasiness and not knowing and ignorance, and selfishness; and that gradually in that kind of an admittance even if you pronounce it in such terms, that you say my requirement 18 now > that I accept myself as I am having been crystallized on this barth as a result of Mother Nature or whatever it is of the Cosmic Kay that made me here, live here and be here, and then in accepting that, and myself as I am, I start something that can take the responsibility of my own and knowing what it cost, I say, So nelp me God. When you wish to create little 'I' it is something/serious. It is not just a flippant nonsense that you happen to talk about When you come to a meeting here, you have to be that serious about it; otherwise it will not do you any good. Therwise you man as well waste your time by going to a movie, When you come here you want to find something, if you want to that can help you to grow and to live, That can give you understanding about yourself, that it is worthwhile to spend so many h seriousness, that you set/aside for yourself bthat you come here for that kind of purpose of spending an hour or an hour and half

( '

in really talking sense, and to learn what it is xx to make more sense of your life and to try to light what is this kind of a road sometimes indicated as the only way way what is it that I must follow? that is xx necessary trirst for me to know? Then slowly proceeding as if your are already an old man, careful and completely aware of how you what is involved 2 take one step or another because you know in the first place, your real understanding, your maturity and in the second place your possibility of the continuation of your life, in the third place, the understanding of the wisdom which will place you on a scale in relation to all things in the universe, a certain place of crystallizing in which you have a task to fulfill because understanding the crystallization as the final word then exists, the possibility is given that at that point evolution could start and then create the equilibrium for the a little of what I would like to involutionary law. N You see Wow tell you of what I believe in what T which person really to know, Ind that it doesn't matter if you don't know perhaps now you may be affected yet but that later on perhaps ; It will all come back to you in some way or other. Mand then forget, There will be a time when you will have to see it and face it. You won't run away from such a lawd. They are not made by this government. They are made by something entirely different. They are inherent in the humanness of manykind of which you are a part, I say again, flike it or not, you are a numan being. W You are not an animal, you re are not a plant, you are not a crystal as yet because even if certain things are crystallized at a certain place, there is still life that becomes apparent in a certain form and that gives the difference between the knowledge that life exists and that if it didn't it would be a dead plant or a dead body of which also there are many in the universe. But as man,

still alive and and having the possibility of taking in impressions that he comes to his senses, five senses, belonging to an outside world and his rejecting world of what is for him his outside world, and the wish to go deeper will create kind of in addition for him two different senses as that the total will become seven.

Then he willunderstand the law of Heptaparaparshinokhe then he will know that the law of phenomena is phenomenal to him as something existing, which then makes him part of the universe.

gradually with the understanding of that what ought to develop
the number three becomes more important than seven, so that then
his centers being threefold, his own unity at times being threefold
for not complete. The wish to grow making to a man in reality for him
the possibility of three full grown bodies on this Earth: physical,
emotional or Kesdjanian, and intellectual or Soul. That then Modulation
demands of him that he apprendiction.

demands of him that he crystallizes out that is the interesting evolution part: that/at that time is overpowered by involution simply for the sake of making the next jump possible to another kind of a level in which then knowing what he was a can be remembered and knowing what he wishes to become has become clear for him in the next Such a state of a person of wequilibrium of three bodies existing

is exactly the peace or contentment of a man where ne can live at ease with inself. And it is in that joining, almost looking as if he loses his colution, looking as if from three he becomes one; In this oneness all three are still present. So that at such a level there are two possibilities: one, to return to Earth; looking two, to go up, either to the planetary level or to the Jun. Man has a choice at such a time, he will not know what he will chose until he gets there but the characteristics are, but he becomes

double-faced. One face can turn to unconscious existence as exemplified by the components of his three bodies; the other face is turned towards the possibility of an objective world in which the totality of himself as become one; then at that time being able to go through the eye of a needlest things you must keep on thinking about. You will learn more. the more you it the more the gate of Heaven will opem; the more there will be wish for life and less fear for death, the more you will able to free yourself by the grace of bod. to maintain yourself as you should be and wishing to become And then realizing that in the end that what is, is everywhere and always and it is really, you say then, such nonsense to go away from where I am the to go to libet when I can find God here now because he is omnipresend in his infinity, that one lives if you understand Work on yourself, for that w you wish to Work for that you with

are willing to give up little things in order to obtain the pearl of great orice, that what is the Holy Sacrament or what even may be the Holy Cross or the golden stag that what Sp.??

Pargifal wanted, the search to become one with infinity and in the process having to become infinity himself.

I hope to see you again sometime. All I can wish for you is that you could have the wish to work and that you could keep it as a wish and making it follow monattempt to create little 'I'x for your benefit.

I hope Gurdjieff will be blessed by your efforts in time.
